

Handheld nozzle AKRON TurboJet 1720

Product features:

Matière: Pyrolite
 Length: 241 mm
 Débit: 100 - 200 - 300 - 450 LPM @ 6 bars
 (CE version)
 Débit: 115 - 230 - 360 - 475 @ 7 & 5 bars (non CE)
 POIDS.: 1.8 kg
 Manufacturer's warranty: 10 years
 Inlet diameter: 1.5" (DN40)
 Certification: CE Standard EN 15182
 Certification: US: NFPA 1964

Reference: 20350
 EAN13: -

Connection: sans raccord, avec raccord
 STORZ C-52 (66mm entre griffes)

Why choose the handheld nozzle AKRON Turbojet 1720?

The Turbojet 1720 stands out for its advanced features, guaranteeing reliable performance and simplified use in the field. Key benefits include:

- **Adjustable flow rates** for precise adaptation to each job.
- **Modular jet system** for fast switching between straight and diffused jets.
- **Robust Pyrolite design**, ensuring resistance to extreme conditions.
- **Ergonomic grip** for greater comfort and reduced user fatigue.

Turbojet 1720 technical specifications

| | | |
|--|--|--|
| | | |
| | | 115, 230, 360 or 475 liters per minute at 7 bars, for optimum adaptation to different intervention situations. |
| | | |

| | |
|-------------------------|--|
| <i>Jet type</i> | Possibility of switching from a powerful straight jet to a diffused jet, with a quarter-turn rotation, facilitating rapid adjustment of the jet shape. |
| <i>Materials</i> | Extruded Pyrolite body and sleeve, for lightness and robustness, adapted to demanding conditions. |
| <i>Maximum pressure</i> | Withstands a maximum operating pressure of 7 bar, guaranteeing reliable performance even in high-pressure situations. |
| <i>Maximum pressure</i> | Rubber bumper with raised lug for tactile identification of spray pattern, ideal for operations with reduced visibility. |

Recommended applications

- **Urban fires:** Adaptable flow rates and spray patterns for maximum efficiency in built-up environments.
- **Industrial fires:** Ability to handle high pressures and deliver high flow rates to control complex fires.
- **Interventions in confined environments:** Precise jet control to minimize collateral damage and maximize responder safety.

Why choose MMF Protection et Sécurité?

As Akron Brass' **main dealer** and **authorized repair center** in France, MMF Protection et Sécurité guarantees you :

1. **Recognized expertise:** Personalized advice to select the equipment best suited to your specific needs.
2. **Dedicated after-sales service:** Maintenance and repairs carried out by certified technicians to guarantee the longevity of your equipment.
3. **Spare parts availability:** Quick access to essential components to minimize equipment downtime.

For further information or to order the **Turbojet 1720**, please contact **MMF Protection et Sécurité**akron Brass, your trusted partner for Akron Brass equipment.
