Power supply: Batteries

Autonomy indicator: No

Lighting mode: High - Low - Flashing

Light output: High 259 lm / Low 71 lm

Beam range: 90 / 48m

Waterproofing: IPX4

Length: 5.7 cm

Weight with batteries: 96 gr

Battery type: LR03

Number of batteries: 3

Batteries included: Yes

Autonomie.: 11h

Refillable: No

Peli™ 2750 Headlamp - Powerful, hard-wearing illumination

Discover the [Peli™ 2750 headlamp](#), an essential for all your lighting needs. Thanks to its powerful LED light and proven Peli™ headlamp technology, this **headlamp** offers excellent value for money.

The **Peli™ 2750 headlamp** is designed to withstand weather, shocks and falls. It produces a maximum brightness of 259 lumens, perfect for a variety of outdoor activities. Compatible with helmet or direct over-the-head wear, it's ideal for professionals and adventure-seekers alike.

A red LED light on the front helps preserve the user's night vision.

Peli™ 2750 headlamp features:

The **Peli™ 2750 headlamp flashlight** runs on 3 AAA batteries, offering long-lasting autonomy. Weighing just 96 grams, it's lightweight and easy to carry. Its powerful beam can reach up to 90 meters, making this headlamp essential for your nighttime expeditions.

Advantages of the Peli™ 2750 headlamp:

- **Helmet mounting bracket** : The Peli™ 2750 headlamp is equipped with an adaptable bracket, perfect for hard hats.
- **quick battery change** : Its housing allows easy access to the batteries for quick replacement.

- **lightweight** Easy to carry, this headlamp is a practical and effective hands-free lighting solution.
- **3 Lighting Modes :**
 - High light mode: Ideal for situations requiring high light levels.
 - Energy-saving lamp mode: for extended battery life.
 - Flashing lamp mode: Useful for emergency situations and signage. U
 - A red LED light on the front helps preserve the user's night vision.

The Peli™ 2750 headlamp is particularly useful in emergency services, fire departments... for example.

The Peli™ 2750 headlamp equipped with an adaptable holder, the lamp is easily attached to protective helmets. During emergency interventions in burning buildings, firefighters can wear the lamp on their helmets, allowing them to have their hands free to handle equipment while lighting their way. It is also equipped with a housing for easy access to the batteries for rapid replacement. In a situation where every second counts, such as when searching for victims in rubble, the ability to quickly change batteries without losing time is crucial.

In addition to its three important lighting modes, the 2750 headlamp features a red LED light on the front to preserve the user's night vision, particularly advantageous when searching for missing persons; see without dazzling their teammates or disrupting their adaptation to the dark.

Contents of the Peli™ 2750 headlamp :
