Certification: US: NFPA 1964

Reference: -

EAN13: -

Inlet diameter: 1.5" (DN 40), 2.5" (DN 65)

Handheld nozzle AKRON® ProVenger 1616: versatility and performance with MMF

The handheld nozzle hand-held AKRON® ProVenger 1616, distributed in France by **MMF Protection et Sécurité** is a reliable, high-performance solution for fire-fighting professionals. Adapted to the needs of **emergency services, industries and specialized interventions**, this handheld nozzle offers exceptional versatility thanks to its multiple configurations and features.

Why choose handheld nozzle ProVenger 1616?

The handheld nozzle **ProVenger 1616** is part of the brand's renowned ProVenger™ range **AKRON®**. Designed to meet the demands of professionals, it offers :

- **Adjustable flow:** five flow levels (115, 230, 360, 475 or 550 l/min) to suit all scenarios.
- **Optimum control:** smooth transition between straight spray and covering mist.
- **Proven robustness:** resistant, lightweight Pyrolite body, ideal for intensive use.
- **Meticulous ergonomics:** pistol-grip handle for a comfortable grip.
- **Standards compliance:** NFPA 1964 and EN-15182 certified for safety and reliability.
