Certification: US: NFPA 1964

Reference: 38779

EAN13: -

Discover the Turbojet 1703 hand-held handheld nozzle from Akron Brass, state-of-the-art equipment designed for fire professionals who demand performance, reliability and versatility. Distributed in France by **MMF Protection et Sécurité** Akron Brass, main dealer and authorized repair center, this handheld nozzle meets the highest standards in the industry.

Maximum pressure

Pattern identification

Turbojet 1703 benefits

- **Versatility:** Thanks to its adjustable flow rates, the Turbojet 1703 can be adapted to a variety of scenarios, from structure fires to vehicle fires.
- **Ease of use:** Intuitive transition between different jet patterns enables operators to react quickly to changing needs in the field.
- **Durability:** High-quality materials ensure long service life, even under intensive use.
- **Safety:** Ergonomic design and tactile identification features reduce the risk of error during critical interventions.

Recommended applications

The Turbojet 1703 is ideal for :

- **Urban fires:** Adaptable flow rates and jet patterns for maximum efficiency in built-up environments.
- **Industrial fires:** Ability to handle high pressures and deliver high flow rates to control complex fires.
- **Interventions in confined environments:** Precise jet control to minimize collateral damage and maximize responder safety.

Why choose MMF Protection et Sécurité?

As Akron Brass' main dealer and authorized repair center in France, **MMF Protection et Sécurité** offers you :
