

Handheld nozzle AKRON TurboJet 1766 (without handle)

Product features:

Matière: Pyrolite
 Length: 190 mm
 Débit: 115 - 360 - 475 - 550 - 750 LPM @ 5 and 7 bars
 POIDS.: 1.6 kg
 Inlet diameter: 1.5" (DN40)
 Certification: US: NFPA 1964

Reference: 39374
 EAN13: -

Discover the Turbojet 1766 hand-held handheld nozzle from Akron Brass, an innovative solution designed for fire-fighting professionals. In France, **MMF Protection et Sécurité** is your main dealer and authorized repair center, offering recognized expertise and dedicated after-sales service.

Turbojet 1766 technical specifications

	115, 360, 475, 550 or 750 liters per minute at 7 bars, for optimum adaptation to different intervention situations.
	Simple transition from a powerful straight jet to a diffused jet with a quarter-turn rotation, facilitating rapid adjustment of jet shape.
	Extruded Pyrolite body and sleeve, for lightness and robustness, adapted to demanding conditions.

<i>Operating pressure</i>	Available in 7 bar (standard) or 5 bar (optional) configurations, offering flexibility to suit operational needs.
<i>Ergonomic design</i>	Tactile identification of jet shapes thanks to a raised lug, ideal for operations with reduced visibility.

Turbojet 1766 benefits

- **Versatility:** Thanks to its adjustable flow rates, the Turbojet 1766 can be adapted to a variety of scenarios, from structure fires to industrial fires.
- **Ease of use:** Intuitive transition between different jet shapes enables operators to react quickly to changing needs in the field.
- **Durability:** High-quality materials ensure long service life, even under intensive use.
- **Safety:** Ergonomic design and tactile identification features reduce the risk of error during critical operations.

Recommended applications

- **Urban fires:** Adaptable flow rates and jet shapes.
- **Industrial fires:** Ability to handle high flow rates.
- **Interventions in confined environments:** Precise jet control.

Why choose MMF Protection et Sécurité?

1. **Recognized expertise:** Personalized advice to help you choose the right equipment.
2. **Dedicated after-sales service:** Certified maintenance and repairs.
3. **Availability of spare parts:** Quick access to essential components.
