EAN13: -

Adjustable aluminum tripod for flares

The **aluminum tripod** is a sturdy, versatile solution for safely supporting your **flares**. With its adjustable height and durable design, this tripod is ideal for professional use, whether on construction sites, at events or in demanding environments.

Key features of the flare tripod

- **Height adjustment:** Adjustable from **1.45 m** to **4.75 m**, this tripod adapts perfectly to different lighting needs.
- **Durable material:** **chrome-plated steel** construction guarantees excellent resistance to harsh conditions.
- **Optimum stability:** Featuring feet with plumb adjustment, it offers great stability, even on uneven terrain.
- **Load-bearing capacity:** Can support a maximum load of **40 kg**, making this tripod compatible with a wide range of illuminating balloons, including those in the **Luccia** range.

- **Optimized dimensions**
 - **Ground surface diameter:** 1.74 m
 - **Tube diameters:** 35, 40, 45 and 50 mm
 - **Weight:** Lightweight for its sturdiness, at just **14 kg**, making it easy to transport and install.
-

Advantages of the adjustable tripod

1. **Universal compatibility:** Perfect for **self-lighting balloons**, this tripod is suitable for a wide range of professional applications.
 2. **Easy set-up and dismantling:** Designed for rapid installation, it's ideal for frequent deployment.
 3. **Increased safety:** Its stability and high load-bearing capacity guarantee safe use, even in demanding environments.
 4. **Versatility:** Whether for **construction sites, outdoor events** or **emergency response**, this tripod is the essential accessory for efficient lighting.
-

Why choose the aluminum flare tripod?

At **MMF Protection et Sécurité**, we offer reliable equipment adapted to the needs of professionals. Thanks to its sturdy design and compatibility with a wide range of flares, this tripod is an ideal choice for ensuring optimum lighting in all situations.
