Lighting balloons : The ideal lighting for your professional projects

Illuminated balloons offer an innovative, high-performance lighting solution to meet the needs of professionals in a variety of environments. Thanks to their diffused, homogeneous light, they reduce shadows and glare, while guaranteeing optimum visibility over large surfaces. Versatile, these devices are essential for applications such as **construction sites, events or emergency response**.

Light output	18000 lumens	36000 lumens	72000 lumens
Lighting surface	700 m ²	1500 m ²	3500 m ²
Power supply	Mains / Valise Energy		
IP rating	IP 54		
Luminous flux orientation	360°		

Why choose an illuminated balloon?

1. Powerful, even illumination

LED lighting balloons provide soft, glare-free light, ideal for indoor and outdoor work and gatherings.

2. adaptability to all sectors

- **Construction sites:** reliable lighting even in difficult conditions, to improve safety and productivity.
- **Events:** Create a pleasant, functional lighting ambience for festivals, weddings or conferences.
- **Rescue and emergency:** Quick installation and powerful lighting for night-time operations or crisis situations.

3. Easy to install and transport

Lighting balloons are lightweight, compact and designed for rapid installation. They can be tripod-mounted or attached to existing structures as required.

4. Durability and energy savings

Designed with **advanced LED technologies**, these devices are energy-efficient and long-lasting, even in extreme climatic conditions.

Key features of illuminated balloons

1. **Homogeneous light:** Uniform light distribution over a large area, perfect for working or creating ambience.
2. **Durable materials:** Designed to last, illuminated balloons are weather-, dust- and shock-resistant.
3. **Flexibility:** A wide range of models to suit all needs: mobile lighting, fixed installations or transportable devices.
4. **Savings:** Thanks to their low energy consumption, these balloons are an economical solution for long-lasting lighting.

Lighting balloon applications

- **On construction sites:** Improve visibility and safety, even in dusty or poorly lit environments.
- **For events:** Bring diffused, aesthetic light to your installations, ideal for large-scale receptions.
- **For emergency response:** Light up isolated or disaster-stricken areas quickly and efficiently.

Why choose MMF Protection et Sécurité?

MMF Protection et Sécurité offers a complete range of **LED lighting balloons** for all your professional projects. Whether you're looking for a mobile, durable and easy-to-use lighting system, or a fixed solution for specific work areas, we've got what you need.

With our products, you'll benefit from reliable, economical lighting that meets the most demanding professional standards. Discover our catalog today to find the ideal lighting balloon for your needs.
