

Rotating mechanism for monitor Stream Master II (3480-3482)

Product features:

Compatible model: StreamMaster II - 3480
Compatible model: StreamMaster II - 3482
Parts kit for: mechan. complete rotation

Reference: 39089
EAN13: -

Spare parts kit for firefighting monitor StreamMaster II rotation mechanism (3480-3482)

The **firefighting monitor StreamMaster II (3480-3482) Spare Parts Kit** is designed to ensure optimum performance and longevity of your equipment. Specifically adapted to AKRON StreamMaster II models 3480 and 3482, this kit is essential for maintaining smooth, precise movements. With expert support from **MMF Protection et Sécurité** you benefit from a reliable, long-lasting maintenance solution for your firefighting monitors equipment.

An essential rotation mechanism

The rotation mechanism plays a crucial role in the operation of your firefighting monitors:

- **355-degree rotation** for extended coverage.
- Smooth, precise movements, essential in emergency situations.
- **Enhanced reliability** to cope with demanding conditions.

In the event of repeated wear or stress, this kit enables you to quickly and efficiently restore your equipment to optimum performance.

Spare parts kit benefits

The kit includes all the parts required for a complete repair of the rotation mechanism. Benefits include

- **Perfect compatibility** with AKRON StreamMaster II models (3480 and 3482).
- **Simplified installation** for reduced downtime.
- **Cost-effective solution**: repair rather than replace.
- **Performance restored** for smooth, precise movements.

Technical specifications

Features	Details
<i>Compatibility</i>	AKRON StreamMaster II guns (3480, 3482)
<i>Contents</i>	Spare parts for rotation mechanism
<i>Installation</i>	Easy to install on site
<i>Materials</i>	Corrosion- and wear-resistant alloys

MMF Protection et Sécurité your trusted partner

As an official AKRON, **MMF Protection et Sécurité** is with you every step of the way to guarantee the reliability and performance of your fire equipment.

Our strengths:

- **Recognized expertise**: perfect mastery of the specific features of AKRON guns.
- **Technical support**: personalized advice to identify and install the parts you need.
- **Available stock**: parts delivered quickly to minimize business interruptions.
- **Reliable after-sales service**: ongoing support for your equipment.

A sustainable and responsible solution

Repairing rather than replacing is a wise choice that :

- **Reduces waste** by avoiding discarding functional equipment.
- **Optimizes costs** by extending barrel life.
- **Ensures maximum availability** through rapid, targeted repairs.

Ideal applications

The kit can be used in a variety of sectors:

- **Emergency services**: for effective intervention in urban or industrial areas.
- **Industrial sites**: refineries, petrochemical platforms and other demanding environments.
- **Marine applications**: with corrosion-resistant materials.

Rely on MMF Protection et Sécurité
