

## Oil bronze anti-spark wrench DN 50 to 100

Product features:

Reference: 20808  
EAN13: -

### Bronze anti-spark petroleum wrench DN 50 to 100 - Safety and Performance for Sensitive Environments

MMF Protection et Sécurité's **bronze anti-spark wrench** is an essential tool for professionals in the **petrochemical, chemical and hydrocarbon transport industries**. Designed in **non-sparking copper alloy**, it guarantees safe use in **explosive atmospheres (ATEX)**, reducing the risk of accidental ignition.

Highly appreciated by **industrialists and fire-fighters** alike, this braided wrench can be used to **tighten and loosen DN 50 to DN 100 fittings**, ensuring fast, efficient intervention on flammable fluid networks.

#### Benefits and features :

- **Material:** non-sparking copper alloy (bronze)
- **Compatibility:** DN 50 to DN 100 fittings
- **Increased safety:** Meets the requirements of hazardous environments
- **Application:** Ideal for petrochemical, chemical and fire service industries
- **Optimized ergonomics:** Robust, easy-to-handle design

Choose the **petroleum anti-spark wrench**, a reliable and safe piece of equipment, distributed by **MMF Protection et Sécurité**, to guarantee safe and efficient interventions in sensitive environments
