

Hugjet dmb/brass valve dn 40 12/12

Product features:

Accessory type: Lance or tap

Reference: 38755
EAN13: -

The **DMB/Brass Type Hugjet DN 40 12/12 valve** is a high-quality accessory designed to meet the needs of demanding industrial and commercial applications. Made of brass, it combines durability, strength and optimum performance. Its design and technical features make it ideal for a wide range of applications, offering both maximum efficiency and reliability. Thanks to its M36X200 inlet thread, it integrates easily into various types of system, enabling quick and simple installation.

Features :

- **Type:** Hugjet DN 40 12/12
- **Material:** High-quality brass
- **Inlet thread:** M36X200
- **Weight:** 1.2 kg
- **Applications:** Suitable for systems requiring a robust, durable threaded connection.
- **Dimensions:** Designed for installations with a nominal diameter of DN 40.

Advantages of the DMB/Brass valve Type Hugjet DN 40 12/12 :

- **High resistance:** Made of brass, this valve is particularly resistant to wear, corrosion and harsh conditions.
- **Ease of installation:** Its standard M36X200 thread makes it quick and easy to install on many systems.
- **Durability:** The robustness of the material guarantees a long service life, even in demanding environments.
- **Versatility:** Compatible with various types of plumbing systems, this valve is ideal for industrial, commercial and residential applications.

Application:

The **DMB/Brass Type Hugjet DN 40 12/12 valve** is particularly useful in installations requiring fluid flow, while guaranteeing a perfect seal and maximum safety. It is used in sectors such as industry, plumbing and fluid management, where reliability and performance are essential.

The **DMB/Brass Type Hugjet DN 40 12/12 valve** is an essential choice for professionals looking for a reliable, durable and easy-to-install product. Thanks to its high-quality design and M36X200 inlet thread, it meets the needs of industrial and commercial installations while ensuring long service life and optimum performance. Choose this valve to improve the efficiency of your plumbing systems and benefit from a high-performance solution.
