

Handheld nozzle AWG TURBO GOLD 235 SOLAS MED

Product features:

Length: 265 mm

Flow range: 60 - 130 - 235 LPM

Max. operating pressure: 16 bar

Reference: -

EAN13: -

Connection: included: symmetrical DSP 40
(latching), included: Gas 2" A (male)

Handheld nozzle AWG TURBO GOLD 235 SOLAS MED - Maximum performance and safety

The handheld nozzle **TURBO GOLD 235 SOLAS MED** from **AWG** is top-of-the-range equipment designed to guarantee maximum efficiency in fire-fighting. **SOLAS MED** certified, it meets the strict standards of the maritime and industrial sectors, ensuring optimum reliability even in the most demanding conditions.

With its ability to deliver a **powerful, adjustable flow rate**, its adjustable spray pattern and its proven robustness, it represents an essential choice for professionals looking for a **high-performance, durable and safe handheld nozzle**.

MMF Protection et Sécurité, a specialist in fire-fighting equipment, is the main reseller of this model, and will support you in its acquisition and maintenance.

Why choose handheld nozzle AWG TURBO GOLD 235 SOLAS MED?

This handheld nozzle model is distinguished by several key features:

?? **SOLAS MED certification**: Meets international requirements for marine applications.

- ?? **Versatility of use:** Suitable for use at sea, in industrial environments and for critical infrastructure protection.
- ?? **Precise jet control:** Easy switching between **straight jet, diffused jet and protective jet.**
- ?? **High resistance:** Robust alloy design for enhanced durability in extreme conditions.
- ?? **Adjustable flow rate:** Allows optimum water management for maximum efficiency.
- ?? **Ergonomic grip:** Designed for intuitive, safe handling.

TURBO GOLD 235 SOLAS MED technical specifications
