

Bronze spear shaft

Product features:

Accessory type: Lance or tap

Reference: -

EAN13: -

Thread: M36x200

DN Connection: DSP 40

Bronze lance barrels - robustness and performance for fire-fighting systems

The **bronze lance barrel** is an essential component of fire-fighting equipment, guaranteeing **optimum water distribution** and **resistance to extreme conditions**. Made from **high-quality bronze**, it offers **excellent durability**, even in wet and corrosive environments, making it the preferred choice for **industrial and marine fire-fighting systems**.

Thanks to its robust design, the **lance barrel** ensures **constant flow** and **high mechanical strength**,

guaranteeing optimum performance in response. It is compatible with different types of **fire hoses**, ensuring perfect adaptation to the needs of fire protection professionals.

Benefits and features :

- **Material:** High-strength bronze, ideal for demanding environments
- **Durability:** Corrosion-, temperature- and impact-resistant
- **Optimized flow:** Designed for excellent hydraulic performance
- **Compatibility:** Suitable for industrial, marine and emergency service fire systems
- **Reliability and safety:** Ideal for intensive use in response operations

Choose a **bronze lance drum**, a reliable and robust piece of equipment designed to guarantee the **safety and efficiency of fire-fighting systems** in all circumstances.
