Product features:

Age: Infant

Category manikins: Mannequin de simulation médicale

Reference: -

EAN13: -

Gender: Female, Male

Newborn dummy for changing exercises (female version).

This realistic newborn dummy, 50 cm tall and weighing 1.2 kg, is designed to imitate the movements and characteristics of a real baby. It is ideal for training and group exercises, such as bathing and changing workshops. Movable joints simulate all the manipulations required when caring for a baby, while providing a realistic, hands-on learning experience.

Features:

- **Model:** female newborn
- **Size:** 50 cm
- **Weight:** 1.2 kg
- **Materials:** soft, resistant plastic for easy, realistic handling.
- **Joints:** Arms, legs and head can be moved to facilitate changing, bathing and other care exercises.
- **Use:** Perfect for group training (classrooms, schools, vocational training).
- **Ease of maintenance:** Easy to clean and maintain after each session.

Benefits:

- **Realistic representation** of a newborn baby.
- **Ideal for learning** care techniques, including bathing and changing.
- **Suitable for intensive use** in educational and training settings.
- **Female version** for a variety of newborn replicas.

Newborn dummy for changing exercises (male version)

The male model of the Change Exercise Newborn Mannequin is designed to provide a realistic, affordable replica, ideal for care exercises. Like the female model, it measures 50 cm and weighs 1.2 kg, offering a weight and size similar to those of a real baby. It's perfect for group or individual training, enabling care gestures to be simulated effectively and authentically.

Features:

- **Size:** 50 cm
- **Weight:** 1.2 kg
- **Materials:** Soft plastic, durable and easy to handle.
- **Joints:** Arms, legs and head can be moved to simulate actions such as changing, bathing and caring for the baby.
- **Use:** Ideal for group or small-group workshops and training courses (schools, health institutions, parenting workshops).
- **Care:** Easy to clean and disinfect after each use.

Benefits:

- **Simulates a wide range of** baby care activities.
- **Realistic replica** for total immersion in infant care training.
- Male model complements female model for a variety of exercises.
- **Robust product designed for frequent use** in educational and professional settings.
