

Mouth to mouth mask key ring

Product features:

Reference: 32056
EAN13: -

The **key-ring mouth-to-mouth mask with non-return valve** is essential first-aid equipment for anyone wishing to be prepared to react in an emergency. The mask is designed for use in cardiopulmonary resuscitation (CPR) situations where it is crucial to avoid direct contact with the victim's airway. Thanks to its **non-return valve**, it provides effective protection for the user, while allowing optimal ventilation. This model is **single-use**, guaranteeing impeccable hygiene every time. Practical and discreet, it comes in a **key-ring** version, so you can take it with you wherever you go, whenever you need it.

Features :

- **Type:** Mouth-to-mouth mask with non-return valve.
- **Use:** Single-use for optimum hygiene.
- **Anti-return valve:** Prevents the return of the victim's body fluids, protecting the user.
- **Portability:** Supplied as a key ring for easy, discreet transport.
- **Dimensions:** Compact and lightweight, easy to carry in a pocket, bag or on a key ring.
- **Material:** Soft, medical-grade plastic, suitable for emergency use.
- **Includes:** Resuscitation mask, protective cover and key ring attachment.
- **Standards:** Complies with resuscitation safety and hygiene standards.

Benefits:

- **Maximum protection:** The non-return valve ensures optimum safety against the risk of contamination during resuscitation.
- **Convenient:** Its key-ring format means you can take it anywhere, without taking up too much space. You can keep it close at hand, whether in your bag, pocket or attached to your keys.
- **Easy to use:** Designed to be used in seconds, even by people not trained in resuscitation.
- **Guaranteed hygiene:** Single use for each procedure, avoiding any risk of transmitting infection or disease.
- **Compact and discreet:** Very small, it takes up no space and can be transported discreetly, giving you

constant peace of mind.

Use:

The **key-ring mouth-to-mouth** mask is an essential accessory for everyone, from healthcare professionals and first-aiders to anyone who wants to be prepared in an emergency. Its compact size makes it **immediately accessible**, whether worn in your first-aid kit, in your car, or directly on your keys. It is particularly recommended for :

First-aiders and **medical personnel** in emergency situations.

Drivers and **cyclists** who want to be prepared in the event of an accident.

Travelers who need a quick and convenient way to deal with incidents in remote areas.

Families looking for a way to be prepared for an emergency at home or away.

In short, the **key-ring mouth-to-mouth mask** with **non-return valve** is the ideal emergency tool to ensure you're always ready to respond in an emergency. Compact, hygienic and effective, it offers both safety and peace of mind. Leave nothing to chance and equip yourself with this essential resuscitation accessory. With its non-return valve and practical key-ring format, this mask will accompany you in all situations where every second counts
