1-liter eyewash bottle pH NEUTRAL PLUM 4746

PH Neutral is a 4.9% sterile phosphate buffer solution, specially designed to rapidly neutralize acids and bases in the event of chemical contamination of the eyes or skin. It enables fast, effective cleaning, reducing the risk of serious chemical-related injury.

Features:

- **Concentration:** 4.9% phosphate buffer.
- **Form:** Sterile solution.
- **Use:** Neutralization of acids and bases.
- **Equipment includes:** Ergonomic eyepiece for optimal eye rinsing.
- **Rinsing time:** Approx. 2 minutes.
- **Sterility:** Ready-to-use product, guaranteed contamination-free.

Benefits and uses:

- **Rapid neutralization:** The solution effectively buffers acids and bases, reducing the risk of serious injury from chemicals.
- **Ergonomic spoon:** Ensures precise, effective rinsing of the eye, facilitating the evacuation of contaminated liquid for complete cleaning.
- **Convenience:** Easy to use in emergency situations, with rapid rinsing time (approx. 2 minutes).
- **Enhanced safety:** In the event of chemical contamination, the use of pH Neutral helps minimize the risk of chemical burns and irritation.
- **Compliance with standards:** Solution complies with safety requirements for chemical risk environments.

The pH Neutra Pluml bottle is an effective and practical solution for emergency situations where chemicals come into contact with the eyes or skin. Thanks to its specific formulation and ergonomic eye cup, it rapidly neutralizes contaminants, guaranteeing optimum protection. Its ease of use and rapid rinse time make it a must-have product for professional environments sensitive to chemical hazards.
