Since 1976, the **Peli™ Protector case** has been a symbol of ruggedness and reliability in the protection of sensitive equipment. Designed to withstand the most extreme conditions, these cases are made in the USA and stand out for their ability to survive the harshest environments, from freezing temperatures to intense heat. Whether you're a field professional or a seasoned amateur, the Protector case from Peli™ guarantees optimum protection for your sensitive equipment.

Features :

- **Rugged construction:** Made from high-quality materials, the case is designed to be **waterproof**, **shockproof** and **dustproof**, offering maximum protection.
- **2 layers of Pick N Pluck™ foam:** A customizable foam that lets you cut and tailor the suitcase's interior to your specific needs. This foam is accompanied by rolled foam for the lid, ensuring even greater protection.
- **Automatic pressure-balancing valve:** balances the suitcase's internal pressure, preventing moisture build-up and ensuring a better seal on the outside.
- **Overmolded rubber handles:** Ergonomic handles for a comfortable grip, even during long handling.
- **Watertight lid with O-ring seal:** The O-ring seal ensures a perfect seal between the lid and the case body, offering protection against moisture, dust and external elements.
- **Easy-open double-turn locks:** Secure locking systems, yet easy to open quickly.
- **Stainless steel hardware:** Built to last, with a stainless steel structure that reinforces the case's strength and durability.
- **Peli Limited Lifetime Warranty:** The case is covered by a lifetime warranty, unless prohibited by local legislation.

Benefits:

1. **Optimum protection for your equipment:** Whether you're transporting electronic, medical or sensitive equipment, the Peli™ Protector case guarantees protection against shock, moisture, dust and pressure changes.
2. **Reliability in extreme conditions:** Tested in the harshest environments, it withstands extreme temperatures and difficult weather conditions, offering uncompromising security for your most precious possessions.
3. **Ease of use:** With its ergonomic handles, easy-to-use locking system and customizable foams, this case makes use simple and convenient.
4. **Long-term durability:** Made from high-quality materials, this suitcase is designed to last for years, backed by a lifetime warranty (subject to legal conditions).

Use:

The **Peli™ Protector** case is ideal for anyone who needs to transport valuable or sensitive equipment in difficult working conditions. It is indispensable for :

Photography, audiovisual or technology professionals who need to protect expensive and fragile equipment.

Military personnel, researchers, explorers or engineers working in extreme environments (low temperatures, intense heat, high humidity).

Travelers or adventurers looking for a case capable of protecting their belongings against the elements and shocks.

The **Peli™ Protector case** is a must-have investment for anyone looking to protect sensitive equipment in the most extreme environments. Made in the USA from top-quality materials, it offers exceptional features such as waterproofing, shock resistance and the ability to customize the interior to suit your needs. Thanks to its automatic pressure-balancing valve and reliable locking system, this case ensures maximum safety while being easy to transport and use.

When you choose the **Peli case**, you're opting for rugged durability and the peace of mind of knowing your most precious possessions are well protected.
