EAN13: -

The **trauma bag with full-zip opening** is the ideal tool for medical professionals, first-aiders or anyone needing functional, secure storage for their medical equipment. Designed to meet the needs of emergency response, it offers great organizational capacity and easy access to the various tools required for rapid rescue. Thanks to its various removable pockets and intelligent design, this bag guarantees optimal, practical and efficient storage on the move.

Features :

- **Full-zip opening:** The bag features a full opening with a high-quality YKK® zipper, allowing quick access to all contents.
- **Spacious front pocket:** A large front pocket provides easy access for accessories or bulky items.
- **Removable interior pockets:** Three removable interior pockets in different colors, with a transparent front section, measuring 28x11x7 cm. These pockets allow you to separate and organize your gear in a clear and orderly fashion.
- **Rigid divider:** For optimum organization, a rigid divider is included to divide the interior of the bag and keep equipment securely in place.
- **Additional storage:** The bag is equipped with wired pockets and elastic loops for even more precise management of contents.
- **Easy, comfortable transport**

- **Hand carrying handles:** Easy to carry by hand thanks to sturdy handles.
 - **Comfortable, over-molded shoulder straps:** For backpacking, the bag is equipped with comfortable, ergonomic, over-molded shoulder straps for long-distance carrying.
 - **Retractable straps for chest attachment:** Retractable straps enable the bag to be attached to the chest for secure, snug carrying on the move.
-
- **Outer shell:** The bag is made from **CODURA**, a tough, durable material offering maximum protection against wear and tear and harsh conditions.
 - **Retro-reflective tape:** Equipped with Reflexite® retro-reflective tape, this bag ensures your visibility when working outdoors, even in low-light conditions.

Dimensions and weight:

- **Dimensions:** 44 x 34 x 24 cm
- **Capacity:** 34 liters
- **Weight:** 1.6 kg

Advantages :

- **Fast, convenient access:** Full opening allows quick access to the entire contents of the bag, which is essential in an emergency.
- **Optimized organization:** Removable pockets and dividers provide excellent organization, so that nothing is overlooked and medical instruments are easy to identify.
- **Carrying comfort:** ergonomic shoulder straps and carrying handles enable you to carry this bag comfortably and securely, either by hand or on your back.
- **Enhanced visibility:** Reflexite® retro-reflective tape ensures optimum visibility during night missions or in low-light conditions.
- **Resistance:** CODURA coating guarantees the bag's durability, even under intensive conditions of use.

Application:

The trauma bag is specially designed for emergency situations. It's ideal for medical professionals, firefighters, first-aiders or anyone involved in emergency interventions. This bag enables medical equipment such as dressings, bandages, compresses, medicines and other necessary tools to be transported and organized in conditions of maximum safety and efficiency.

The trauma bag with full zipper opening is an indispensable companion for any professional working in demanding environments. Its thoughtful design, high-quality materials and ergonomic features ensure optimal use and comfortable transport. Organize your emergency equipment efficiently, while remaining visible and ready to intervene quickly, thanks to this practical, durable and functional bag.
